

PRESS RELEASE

MAC TRAILER OFFERS MAN-DOOR ACCESS FOR SAFETY

Every owner, safety director or operator has SAFETY as their NUMBER ONE PRIORITY. So, if you do not want your drivers to walk the top rails or jump out of the back of the trailer and your aim is to reduce worker's compensation claims, equip your next MAC dump or transfer trailer with the walk through "MAN DOOR". Or contract the MAC Service Department to have your existing trailer retrofitted with this important safety feature.

MAC Trailer is recognized nationally as the foremost manufacturer of straight truck bodies; and, dump, flatbed and transfer trailers. For more information visit:
