Introducing the all new

# i-4000 SERIES DRIVE UNIT

Internally Sealed For Prolonged Drive Unit Life

#### DRIVE DESCRIPTION:

Every HALLCO drive unit is custom designed and built to match the individual customer's application and load weight. The 4000 Series, our most popular unit, is often called the "work horse" with thousands of trouble-free units in service. The 4000 Series is widely used for refuse hauling and is well matched to trailers hauling legal trailer payloads. Depending on the deck configuration this drive unit can handle anything from woody biomass and recyclables to C&D debris and solid waste.

Features	Specifications
Load Rating	35 Ton
# Cylinders	6
Stroke	10"
Piston Diameter	3"
Rod Diameter	1.5"
Shaft Coating	Double Chrome
Effective Piston Area	12.37 in <sup>2</sup>
